

## Engineering Society of Buffalo, Inc.—Our History

The Engineering Society of Buffalo (ESB) is one of the oldest engineering societies in New York State. Organized in 1894 and incorporated in 1920, it has been supporting the engineering profession in Western New York for over 119 yrs. The ESB is an organization where engineering is supported, instructed, and discussed. The ESB brings together students, professors, professional engineers, and corporations in a common setting to learn and network.

Corporate membership is a great way to promote one's company while connecting with engineers—from students to seasoned veterans of the industry.

The ESB supports a Scholarship Program for WNY's best and brightest local students. The students attend the State University of New York at Buffalo and Buffalo State College. Most ESB Scholarship winners become ESB members and remain actively engaged in the society - both as students and as engineers. These students are in the top of their field of engineering and often receive numerous awards and recognitions. By becoming a member of the ESB, a corporation has direct access to these bright people.
